

In order to ensure security and legitimacy, it is important to be aware of you web browser's address bar. When visiting Sunrise Bank via the web, the address <https://www.SunriseBank.com/> should be visible. A green lock should also be adjacent to the address bar. This green lock means encryption is active. Once you have proceeded from our main webpage into Online Banking, it is important to note that the web address will change to <https://secure.fundsxpress.com/> , this is normal.

Here are some screenshots of the above, as seen in a variety of different browsers:

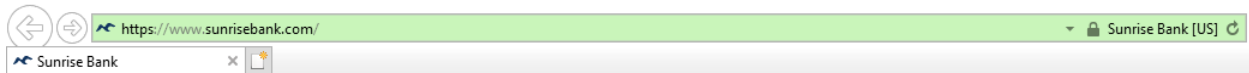

Chrome

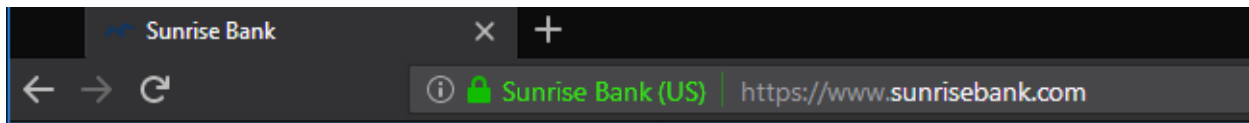

Edge

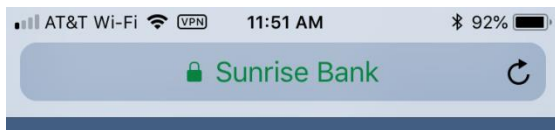

Internet Explorer

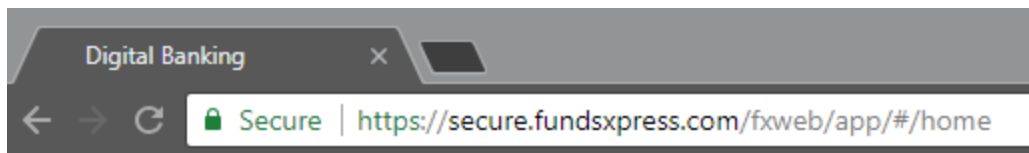

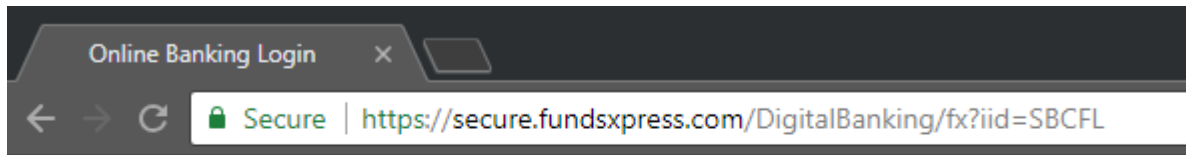

Firefox

iOS Safari

And here is a pair of screenshots showing the address bar while inside Online Banking:

Welcome .
